

Employee IT FAQ

How do I reset my password?

Use the Security Portal and follow the approved password reset procedure. MFA and identity verification are required.

How do I report a VPN problem?

Open an IT support ticket and include the exact VPN error, client version, operating system, and gateway name when available.

Can I sync confidential credentials with CloudSync?

No. Active credentials, private encryption keys, and similar authentication secrets must not be synchronized through CloudSync.

What should I do if I cannot access my MFA device?

Use the approved one-time recovery code if available. Otherwise, contact IT Support for account recovery.

How much CloudSync storage do I receive?

Standard employee accounts receive 100 GB. Additional project storage requires manager approval.
